

Press release

The International Aspirin Foundation strengthens its Scientific Advisory Board and welcomes Professor Badimon

The International Aspirin Foundation is delighted and honoured to welcome Professor Lina Badimon to its Scientific Advisory Board. Professor Badimon's research activities focus on thrombosis and hemostasis, atherosclerosis, lipids and inflammation.

Peter Rothwell, Chairman of the Scientific Board, commented, "The Foundation allows aspirin to be discussed in as broad a context as possible and brings together experts to discuss the implications of trials and other research in mechanisms, prevention and treatment across multiple diseases" and continues "Professor Lina Badimon is a welcome addition to the Scientific Advisory Board and she enhances the expertise of the board from both a geographical and a clinical perspective."

Lina Badimon states "I am pleased to be joining The Foundation and look forward to contributing to its initiatives".
